

Time to make a **FRESH** start!

With the current heightened importance of infection control our range of Fresh disinfectants are particularly suitable for establishments within the care sector, but also lends itself to use in many other areas. A long-standing successful feature of the Fresh product range which makes it widely popular is its germ-killing power as well as its versatility and the fact that it is available in three different fragrances.

Three fresh fragrances:

*Fresh Floral
Bouquet*

*Fresh Wild
Lemon*

*Fresh Mountain
Pine*

Versatile

The Fresh products are effective in various applications:

Disinfecting/deodorising - Diluted with water at a ratio of 1:50, Fresh is an effective disinfectant and deodoriser for use on washroom surfaces, floors, toilets, urinals, waste bins, waste disposal chutes, sports equipment, sunbeds, etc.

Air freshening - Applied through a trigger spray, Fresh can be used as an air sanitiser to eliminate stale odours in bars, nightclubs, nursing homes, etc.

Germicidal

With a germicidal formula containing three active biocides, the Fresh range provides peace of mind that treated surfaces have been left thoroughly disinfected: an important benefit in areas where infection control is paramount. Fresh Wild Lemon and Fresh Floral Bouquet kill 99.999% of bacteria, and have been proven to kill MRSA NCTC 12493.

Ideal for:

Leisure centres

Care homes

Bars

Hotels

Shops

Public buildings

Fragrant

The Fresh disinfectants are available in three different fragrances to suit individual preferences. Choose from Fresh Wild Lemon, Fresh Floral Bouquet or Fresh Mountain Pine, all of which contain perfume oils to leave a long lasting freshness.
